

Therapeutic Interchange Database

ConnectureDRX Therapeutic Interchange Database includes over 140 drug classes covering over 42,000 NDCs.

This database can be leveraged at multiple points in the prescription life-cycle (consumer, prescriber, pharmacy, health plan) to improve patient outcomes. Presently, our database is used by some of the largest health plans and Pharmacy Benefit Managers nationwide.

No other data set more accurately and completely reflects the drug research occurring today.

Partner with ConnectureDRX to relieve the administrative burden of maintaining your own therapeutic interchange database.

Proven Results

- Delivers results for over 50 million annual drug searches
- Currently being utilized by 2 of the top 3 largest health plans and 3 of the top 5 PBMs
- In a recent health plan pharmacy saver program for commercial members, ConnectureDRX provided (on average) 3 therapeutic interchange options per drug—an average savings of over \$280 per member/per month
- In looking at the Top 200 Drugs prescribed in the U.S., ConnectureDRX can provide therapeutic interchange options for more than 70% of the drugs with over 40% in savings

Example: Insulin for Diabetes
A savings of 62%-67% over brand drugs

Therapeutic Alternative

Semglee Insulin
\$180 Retail!

Levemir Insulin*
\$550
Retail Average

Lantus Insulin*
\$475
Retail Average

*Lantus and Levemir for diabetes are in the top 200 drugs by U.S. drug spend

Why Choose ConnectureDRX?

- Our team of clinical pharmacists and practicing physicians conduct in-depth clinical reviews for every drug in the Therapeutic Interchange Database:
 - Clinicians review medical literature including current practice guidelines and clinical studies, to identify evidence-based therapeutic interchange drug options.
 - The clinical research is then translated into data elements for integration into our database utilizing sources such as Medispan and FDB.
 - All drugs and drug classes included in ConnectureDRX's Therapeutic Interchange Database are continually monitored to ensure all therapeutic options are up to date with new drug approvals and discontinuations, new practice guidelines, clinical studies and safety notices.
- Our therapeutic interchange dataset includes over 140 drug classes covering over 42,000 NDCs. All of our therapeutic interchange options are associated with one or more conditions.
- Over 15 years of experience building and maintaining therapeutic interchange options.
- We provide the most accurate therapeutic interchange information calculating potential switches down to the dosage and quantity level.
- The analysis can be customized to include a plan's formulary and pricing information to find different best fit medications for members on different plans.
